

**"Details matter—
they matter to my patients,
and they matter to me."**

**SCOTT R. MILLER,
M.D., F.A.C.S.**

Plastic Surgery

Dr. Scott Miller has always recognized that plastic surgery requires aesthetic artistry, technical mastery and a commitment to personal care. He went beyond the standard training, completing a prestigious plastic surgery fellowship, and his patients see the benefits. "I attribute my amazing results and recovery to you and your staff," writes one patient. "I am convinced I could not have found a finer surgeon."

Dr. Miller has received particular acclaim for his work in facial rejuvenation. His techniques of double-layer stitching and tissue redraping replace the old-fashioned pulling and stretching and provide a more natural and longer-lasting result.

"Patients are putting their trust in you," Dr. Miller says. "They deserve conscientious and meticulous application of the most modern techniques."

In addition to his vibrant La Jolla plastic surgery practice, Dr. Miller is a voluntary clinical instructor at UCSD and a textbook author on facial rejuvenation. He is board certified by the American Board of Plastic Surgery and specializes in plastic surgery of the face, breast and body. An active staff member at Scripps Hospital, Dr. Miller is also involved with the Interface Program, operating on children with disfiguring birth defects.

Dr. Miller and his staff feel strongly that attention to detail, technical expertise, artistry and individualized patient care are the highest priorities. "Details matter," he says. "They matter to my patients, and they matter to me."
